SENTIMENT ANALYSIS IN THE BIO MEDICAL DOMAIN EBOOKS 2019

Author: Ranjan Satapathy, Erik Cambria u0026 Amir Hussain

Release Date: Lanzamiento previsto: @@expectedReleaseDate@@

The abundance of text available in social media and health-related forums and blogs have recently attracted the interest of the public health community to use these sources for opinion mining. This book presents a lexicon-based approach to sentiment analysis in the bio-medical domain, i.e., WordNet for Medical Events (WME). This book gives an insight in handling unstructured textual data and converting it to structured machine-processable data in the bio-medical domain. The readers will discover the following key novelties: development of a bio-medical lexicon; WME expansion and WME enrichment with additional features; ensemble of machine learning and computational creativity; development of microtext analysis techniques to overcome the inconsistency in social communication. It will be of interest to researchers in the fields of socially-intelligent human-machine interaction and biomedical text mining.
